

Berk Ucak

Batch code: LISUMO2

Data: Iris

I have try different methods but random forest was the most successful one.

Codes can be found on Github

The following is en result's screenshot

Flower Class Prediction

<input type="text" value="Sepal_Length"/>	<input type="text" value="Sepal_Width"/>	<input type="text" value="Petal_Length"/>	<input type="text" value="Petal_Width"/>	<input type="button" value="Predict"/>
---	--	---	--	--

The flower species is ['Virginica']
